Slim High Precision Tungsten Carbide Cutter - Small, Oval

High precision cutter belonging to the small tungsten carbide cutters family. The oval geometry provides excellent resistance, while the head dimensions offer the best advantage to access small areas. The short blade length transmits the operator's full cutting force. The flush cutting edge is suitable to perform clean cuts on the hardest wires. The cutter is equipped with an ESD ergonomic slim handle which allows an excellent grip, suitable to environments and to components susceptible to electrostatic discharge. The tungsten carbide insert blades are hardened to 82HRC. Handle material: Ergonomic Slim - Thermoplastic and Elastomer + PP compound

General Info

Product Number	16950-12
Category	Cutters > Industrial MedTech Line
EAN	4251909512057
