

Moria MC40 #5 Forceps - Biology Tips/Straight/11cm

These forceps have been expertly finished under 40x magnification and have the most finely executed points available. They are extremely light, superbly balanced, and have a gentle spring action. The shanks are specially designed with an arch which ensures maximum force to the tips. The tips close flat for 6mm from the points to give a large holding area, and the bottom portion is slim to reduce their weight.
