#15AGW M Epoxy Coated Cutting Tweezers

The high-precision cutting tweezers type #15AGW are suitable for applications requiring the handling of small materials or making fine cuts. The robust blades are designed for applying moderate cutting forces. They are suitable for cutting small, soft metal wires (e.g., copper). The epoxy resin coating gives the tweezers ESD properties, making them ideal for handling electronic components and for use in cleanrooms.

General Info

Product Number	11521-11
Category	Forceps & Tweezers > Cutting MedTech Line
EAN	4251909512194
