

The Kalt needle holder is characterized by its extraordinary design and good handling. The closure system closes softly and securely and can be easily opened again with your thumb. The needle is held securely when sewing thanks to various groove systems in the gripping surfaces (serration and cross-serration with blood channel). The needle holder is made of stainless steel and can be autoclaved. A straight and a curved variant is available.

General Info

Product Number	12080-14
Category	Needles, Threads & Holders > Needle Holders
EAN	4251909511746
