

Slim High Precision Cutter - Small, Oval

High precision cutter belonging to the small oval cutter family. This type of geometry provides excellent resistance, while the head dimensions allow to access small areas. The semi-flush cutting edge is suitable for perform robust cuts. The cutter is equipped with an ESD ergonomic slim handle which allows an excellent grip, suitable to environments and to components susceptible to electrostatic discharge. The blades are hardened to 67HRC. Handle material: Ergonomic Slim - Thermoplastic and Elastomer + PP compound

General Info

Product Number	16900-12
Category	Cutters > Industrial MedTech Line
EAN	4251909512033
