

Slim High Precision Tungsten Carbide Cutter - Large, Tapered & Relieved

High precision cutter belonging to the large tungsten carbide cutters family. The tapered and relieved geometry combined with the arrow geometry of the tips offer the best advantage to access small areas, while the head dimensions support the cut. The full-flush cutting edge is suitable to perform very clean cuts on the hardest wires. The cutter is equipped with an ESD ergonomic slim handle which allows an excellent grip, suitable for environments and to components susceptible to electrostatic discharge. The tungsten carbide insert blades are hardened to 82HRC. Handle material: Ergonomic Slim - Thermoplastic and Elastomer + PP compound

General Info

Product Number	16954-12
Category	Cutters > Industrial MedTech Line
EAN	4251909512095
