S&T Ball Chain Retraction System - Base Plate

The Base Plate is made of matte stainless steel to reduce glare. The perimeter slots will secure the Ball Chain Retractors, offering retraction in every direction (lateral and upwards) with the help of the Ball Chain Elevators. The Ball Chain Retractors can also be used to hold the animal firmly in position. There are four feet which lift the Base Plate by 1.5cm to facilitate the locking of the Ball Chain Retractors. The Wide Hooks can be attached to the Ball Chain Retractors if desired.

This product is discontinued and has limited availability.
