

Ear Punch - Stainless Steel/2mm Punch Diameter

The Ear Puncher relieves stress on the wrist during ID marking as it requires only a very gentle pressure to cut a hole. The stainless steel puncher has a sloped edge that provides a cut rather than a punch, which minimizes animal discomfort. The ear puncher is autoclavable but should be lubricated to improve longevity.

General Info

Product Number	24916-02
Category	Rongeurs, Punches & Sampling > Punches
EAN	4251909510244
