

Magnifier Spectacles - Wide View / 2x

A precise binocular magnifier for laboratory work. The attachment mounts onto a spectacle frame and provides a magnified, stable view for dissection, microsurgical preparation, and detailed inspection of small specimens.

Binocular optics: Magnified view with both eyes for natural depth perception

Adjustable mounting bracket: Attaches to a spectacle frame and keeps the optics aligned with the eyes

Central adjustment knob: Quick, tool-free positioning of the optical housings

Robust, black anodized housings: Durable and easy to clean

This product is discontinued and has limited availability.
